Concentrus makes online backup secure, flexible and affordable. Consisting of three distinctive service plans, Concentrus enables home, small business and enterprise users to automatically backup their PCs, laptops and servers to a reliable, off-site location. Concentrus delivers total data security with advanced encryption technology and superior performance – making it the trusted online backup system for a global customer base.

Product Offering

Concentrus Home

Backup photos, music, documents and more for pennies a day.

Concentrus Small Business

Business grade data backup for PCs and servers.

Concentrus Enterprise

The power and functionality of Concentrus Small Business - together with the ability to store enterprise data from multiple servers plus SQL and Exchange databases via remote administrative console.

Partnerships

Concentrus, a service of eFileCabinet is based on EMC's Fortress suite of online backup services. In January, 2008, eFileCabinet joined forces with EMC, the global leader in next generation backup solutions as an OEM partner.

Pricing & Availability

Concentrus online backup is available now through www.concentrus.com and the eFileCabinet network of value added resellers. Three specialized plans for home, small business and enterprise start at **\$3.95 per month.**
